

HT 135

Powerful professional pole pruner with telescopic shaft

STIHL's most powerful petrol pole pruner with 4-MIX engine for professional use in tree maintenance, orchards and municipal work. For pruning trees, removing dead wood or breakage from storms, and cutting back fruit trees. Equipped with 1/4" PM3 chain, lightweight magnesium transmission with cast-on robust branch hook. Professional, particularly rigid and guidable telescopic shaft with quick adjustment for exact positioning and precise cutting. Total length 270-390 cm.

Product

Petrol Pole Pruner - HT 135 30cm/12 - 1/4"P SPUR

RRP

\$1,799.00
(incl. GST)

Technical Details

Displacement cm ³	36.3
Weight kg ¹⁾	7.9
Bar Length cm	30
Total length (max) cm ²⁾	3900
Tank volume l	530.00
Saw chain pitch	1/4"P

¹⁾ Weight excluding fuel, guide bar or saw chain

²⁾ With cutting attachment

Features

Standard

Lightweight, robust magnesium gearbox

The lightweight magnesium construction material combines the robustness professionals need with lightweight construction. The lightweight head of the pole pruner ensures reduced strain during longer periods of use.

Robust cast branch hook

The branch hook helps with positioning as you cut. After making the cut, cuttings can be removed easily using the robust branch hook.

STIHL professional chain tensioning system

Lateral chain tensioning prevents hands from coming into contact with the sharp chain and the tips of the claw stop. It also ensures safe and easy chain tensioning. The integrated direction guide on the sprocket cover makes it easier to monitor your direction when positioning and sawing. A captive nut means no risk that the nut will be lost. Lateral chip ejection also reduces the risk of clogging.

Ergonomic quick adjustment

The length can be easily varied using the ergonomic quick adjustment feature. The quick adjustment feature means you only need a quarter-turn to release the mechanism and change the length, then it can be re-tightened.

Optimal handling

A clamp on the telescopic shaft allows for easy tool attachment and quick tool release. It is easy to slide the clamp onto the shaft by hand. This allows the weight distribution and load to be optimally adjusted by the operator when working with the belt and RTS harness. The comfortable handle tube ensures you have a firm grip over the entire gripping area, while the STIHL harness makes your work easier, especially in extended use. Our harnesses offer ample freedom of movement when using the tool. Each model comes with a matching STIHL harness as standard.

STIHL 4-MIX-Motor

You can always rely on STIHL to keep setting new benchmarks this time with 4-stroke mixed lubrication technology. The STIHL 4-MIX engine, which runs on a fuel-oil mix just like a 2-stroke, offers the benefits without the compromises of 4-stroke power. STIHL 4-MIX engine technology provides fast acceleration, more

PLEASE NOTE: Reserving STIHL Products

These products can be reserved online with no obligation and picked up at your local STIHL Dealer. As your satisfaction is of particular importance to us, we provide you with extensive in-store personal instruction including safe handling plus professional advice and service to ensure you get the most out of your STIHL purchase. * Sale price and availability may vary from store to store.

power, added torque, lower noise, reduced emissions and increased fuel efficiency to complete jobs quickly, quietly and more easily.

Anti-vibration system

Intense vibration at the handles of power tools can lead to longer-term effects of blood vessels in the hands and arms. STIHL have therefore developed an effective anti-vibration system where by the oscillations from the machines engine are dampened which significantly reduces vibrations at the handles allowing for more comfortable and safer operation.

Multi-function handle

All engine control functions are integrated into the multi-function handle. The power tool is easy and safe to use – the operator's hand remains on the handle at all times.

Accessories

RTS Harness

The Backpack Harness transfers the weight of a long reach hedge trimmer to the user's hips resulting in a dramatic reduction in back stress while allowing full freedom of movement. The Backpack Harness can be easily adapted to suit the user's size. For HT 75 long reach hedge trimmers.

Bio Plus Bar & Cutter Lube - 1 litre

Particularly eco-friendly with outstanding lubrication and adhesive properties. STIHL BioPlus oil is derived from plants and completely decomposes in the ground within a short space of time (tested according to OECD 301 B). It has therefore been awarded the German 'Blue Angel' ecology mark and the Dollarspean Eco-Label.

Oil - Chain & Bar - SynthPlus - 1L

Do you question which lubricant is suitable for which cutting attachment, climate zone or type of wood? No need to puzzle over the answers with semi-synthetic STIHL chain lubricant. Our high-performance lubricant is extremely suitable for all moving saw chains. Well protected. STIHL chain lubricant effectively protects saw chains from wear. Thanks to its high temperature resistance, cutting attachments are optimally protected even from short-duration maximum thermal loads. Smoking is inhibited. Keeps on flowing. Even at temperatures down to -20° C, STIHL chain lubricant retains its outstanding flow properties. Selected additives prevent resinification of the cutting attachment and other treated parts. And you can start using the saw straight away, even after an extended idle period.

MotoMix - 1L - Tin

Available at participating stores. Ready-mixed fuel (50:1) for all STIHL engines, optimal performance, best cold start ability, maximum acceleration over the entire RPM range, best running characteristics even with a sudden gas change. Mixed with STIHL HP ultra premium oil for exceptional engine lubrication and extreme cleanliness, fully synthetic and biodegradable for optimal performance and long service life. User- and engine-friendly thanks to fewer emissions (free from ethanol; almost no olefins and aromatic compounds). Can be kept in storage for at least two years. Reliable top performance – STIHL engines and STIHL MotoMix are made for each other, all imaginable uses have been put through rigorous tests.
