

FS 94 C-E

STIHL FS 94 C-E Professional Brushcutter

The FS 94 range of grass trimmers have been designed with an emphasis on low weight and slim design. Landscape gardeners and contractors will notice the weight reduction of this new machine as well as the new variable speed feature that allows the machines speed to be dialled up or down, perfect for trimming around delicate plants and windows. With simple starting, Easy2Start and STIHL's fuel efficient and environmentally engine technology the FS 94 range will be the trimmer of choice for the professional and owners of medium to large properties. The new FS 94 range will impress, light weight and jammed packed full of features.

Product

As your satisfaction is of particular importance to us, we provide you with extensive in-store personal instruction including safe handling plus professional advice and service to ensure you get the most out of your STIHL purchase. * Sale price and availability may vary from store to store.

Features

Standard

STIHL 2-MIX Engine

The 2-MIX engine features an advanced stratified charge system that boosts power, whilst reducing consumption and pollution, significantly lowering unburned hydrocarbons in the exhaust. The result is a cleaner, more fuel efficient engine.

Simplified starting system

Simply Set the choke, pump the fuel primer, pull the starter cord and away you go! The running machine then switches off after a brief press of the stop button. Once the machine is at a standstill, the ignition activates again automatically. Thus the ignition is always ready for starting.

STIHL Anti-vibration system

The STIHL anti-vibration system is available in a one-point version for smaller models and in an especially effective four-point version for larger machines starting with the STIHL. It reduces handle vibration for easy and comfortable operation.

Ergonomic bike handle

When used in conjunction with a harness, the bike handle enables a smooth mowing action. Ideal for working on large areas and allows the machine to be easily guided, thus reducing fatigue.

Easy2Start (E)

STIHL Easy2Start makes it possible to start the machine with very little effort. This supports the starting process with an additional spring accumulator between the crankshaft and starting starting device which reduces the force needed to start the machine. Even if you only pull the starting cord slowly the engine starts easily.

Accessories

Universal Harness - Standard

For strength-saving mowing and shredding. Ergonomic, comfortable, light, can be combined with the chest belt and tool bag.

\$150.00

Contact Us for Price and Availability

Varioclean - 500ml
