STIHL

GHE 150

High performing and compact

The STIHL electric shredder GHE 150 combines ease of use, performance and mobility. This impressive machine can shred branches cut from hedges or trees into tiny chippings in no time at all. This is made possible by the integrated sandwich-type blade unit with additional wing blades and ripping blades, which operates with minimal vibrations even when shredding branches with a diameter of up to 35 mm. A powerful motor delivers the constant power required for the machine to operate efficiently. The cloverleaf opening is recessed into the feed chute of the garden shredder. It offers advantages when feeding tree cuttings with wide branches or woody hedge cuttings. Thanks to its transport wheels, the electric shredder can be moved easily to a protected storage place after the work has been done. When you finish gardening, the STIHL GHE 150 can tidy your garden in no time at all and generate material ideal for high-quality compost.

Product

RRP

Electric Garden Shredder - GHE 150

\$799.00 (incl. GST)

Technical Details

Max. branch thickness mm up to 35

Rated voltage V 230

Nominal speed U/min 2800

Weight kg 27

Nominal output W 2200

Cutting tool Multi-Cut 150

Standard

Safety lock

Features

The electromagnetic safety lock prevents the garden shredder from starting automatically during maintenance operations or when the blade is being changed, for example. The safety switch is integrated in the opening mechanism on the STIHL shredder. As soon as the closure screws on the machine are unscrewed, the safety switch is tripped and the current flow is interrupted.

Feed chute with cloverleaf opening

The short, inclined feed chute with cloverleaf opening is positioned at an ergonomically favourable height, allowing branch material with side shoots to be fed safely and conveniently into the STIHL garden shredder.

Accessories

Shredders - Accessories - Container - AHB 050 - 50L

The STIHL AHB 050 shredder bag collects chopped tree and green waste directly from under the shredder. The self-standing shredder bag has a volume of 50L and has been developed for robust everyday work. It can also be used to easily carry larger quantities of chopped material. It is available as an optional accessory for most STIHL garden shredders (with the exception to the GHE 135 L shredder model).
