

## SH 86 C-E

### STIHL SH 86 C-E Vacuum Shredder

Professional Vacuum Shredder with high vacuum power and shredding performance. Low emissions with great fuel economy, ideal for clearing fallen leaves, grass trimmings and other garden debris in commercial applications and for the discerning homeowner. Comes with blower function as standard. Infinitely variable speed control, round nozzle, flat nozzle, STIHL ElastoStart, STIHL anti-vibration system, 2-MIX engine, HD2 filter.

#### Product

Petrol Vacuum Shredder - SH 86 C-E

#### RRP

**\$529.00**  
(incl. GST)

#### Technical Details

Displacement cm <sup>3</sup>	27.2
Weight kg <sup>1)</sup>	5.6
Maximum air flow m <sup>3</sup> /h	810
Tank volume l	440.00
Max. air speed m/s	76

<sup>1)</sup> Weight excluding fuel, fully assembled

#### Features

### Standard

#### HD2-Filter

The HD2 air filter made of polyethylene has significantly finer pores than foam filters, this filters even the finest dust. In addition, the new HD2 filter can be cleaned easily. This means that the filter will last longer over the entire service life of the machine under normal conditions.

#### STIHL 2-MIX Engine

2-stroke engine with stratified charge: During the flushing process a fuel-free layer of air is created between the burned charge in the combustion chamber and the fresh charge in the crankcase. This cushion reduces the amount of fuel lost in flushing discharge during the charge cycle. The result? More power with a lower weight, up to 20% lower fuel consumption than regular 2-stroke engines and significantly reduced exhaust emissions.

#### STIHL Anti-vibration system

Intense vibration at the handles of power tools can lead to longer-term effects of blood vessels in the hands and arms. STIHL have therefore developed an effective anti-vibration system where by the oscillations from the machines engine are dampened which significantly reduces vibrations at the handles allowing for more comfortable and safer operation.

#### STIHL Easy2Start (E)

Easy starting with less effort due to an additional spring between the crankshaft and the rope rotor. A smooth pull on the starter rope tensions the spring against the compression resistance of the engine. The jerks are not transmitted to the rope. The spring automatically transmits the stored energy to the crankshaft, causing it to turn and ensuring reliable starting of the engine.

#### Throttle lock with built in stop switch

The running machine switches off reliably after a brief press of a button. Once the machine is at a standstill, the ignition activates again automatically. Thus the ignition is always ready for starting.

#### One handle control with soft grip area

For secure and comfortable grip. With integrated anti-static system.

#### Manual fuel pump (Purger)

A small fuel pump delivers fuel to the carburettor at the touch of a button. This reduces the number of starting strokes required from a cold start.

#### PLEASE NOTE: Reserving STIHL Products

These products can be reserved online with no obligation and picked up at your local STIHL Dealer. As your satisfaction is of particular importance to us, we provide you with extensive in-store personal instruction including safe handling plus professional advice and service to ensure you get the most out of your STIHL purchase. \* Sale price and availability may vary from store to store.

**Varioclean - 500ml**

Multipurpose biodegradable machine and parts cleaner. Water based, biodegradable, alkaline detergent specifically for dissolving and removing organic oil residues and for cleaning air filters and housings.

**\$20.00**
